Training & Development

Part of our culture at IHS is working together as a team to be every customer's choice for imaging needs. Creating a culture of engagement where we are everyone's workplace of choice to deliver imaging services.

We always strive to be better. We never become complacent and continuously seek improvement on everything, from improving processes for efficiency in providing quality patient care, to how we treat our peers.

Providing Training & Development opportunities is key to our success at IHS. To support the on-going development of our Team Members, we offer:

- *Licensure reimbursement for Technologists*
- *Cross-training programs for multiple departments*
- *Leadership development*
